Observation notes on Andrew Tang
1. Go through the GitHub job postings
2. Check if the job is located in the USA and job title matches my interest (usually Software enginner intern)
3. Open the job posting link
4. Make sure I meet the job requirements in the job description
5. Press apply and fill out the application using an autofiller
   a. Sometimes the autofiller doesn't work, so I'll need to manually fill in details
      i. May need to open resume,cover letter, etc. to properly paste in details
6. Do a final review of my application to ensure information is correct
7. Click submit
8. Log/mark the job posting as submitted so I know I've looked at it
9. Done

Sungwoon Park
1. Go through the LinkedIn Job postings
